CV Summary and Objective

Upon graduating from university, I seized the opportunity to integrate my theoretical knowledge with practical experience. Working as a Backend and Full-Stack Developer in a small team on freelance projects, I honed my leadership skills and enhanced my technical abilities. Post-graduation, I ventured into the realm of Testing, steering my career in this direction.

My goal is to leverage my expertise in Development and Testing, contributing to a dynamic company and advancing my career in these domains. The key to progress, in my view, lies in applying theoretical knowledge in practical scenarios and maintaining a focus on learning something new every day.

Work Experience

04/2024 – ~

Testinium

Test Automation Engineer at Kroll

- Maintaining and enhancing the existing large-scale test automation framework to ensure robust and reliable testing processes.
- Developing and integrating new test cases into regression and smoke test suites for newly implemented features.
- Collaborating with development and QA teams to identify test requirements and ensure comprehensive test coverage.

12/2022 – 04/2024

Testinium

Software Test and Quality Specialist at Kroll

- Serving as the coding architect for foundational work on two additional testing frameworks.
- Collaborating closely with team members for effective project management and quality assurance.
- Upholding high coding standards through active participation in code reviews and optimization efforts.

11/2021 – 12/2022

Testinium

Assistant Software and Test Specialist at Kroll

- Executed web automation using Selenium and Java, enhancing testing efficiency.
- Conducted API testing with RestAssured, ensuring backend service reliability.
- Applied Blazemeter for load testing, identifying and resolving performance bottlenecks.

Study Experience

09/2017 – 06/2021	Trakya University Computer Technologies and Information Systems
09/2013 – 06/2017	Profilo Technical High School Database Programming

Skills

Java:	Good (Selenium, JUnit, RestAssured)
SQL:	Good (MSSQL, SQLite, MySQL)
PHP:	Good (Laravel, Composer)
Cucumber:	Good
Postman:	Good
JS:	Intermediate
C#:	Intermediate (.NET, WPF, MVC)

Projects

SecreTalk	Developed a secure online communication system with peer-to-peer encryption, bolstered by user-secured password files. Ensured increased security through log-less text, speech, and file communication.
FTP Loadr	Created a Hook project for seamless file retrieval from FTP, loading into a Database, and notifying the designated admin via email. Streamlining data processes with efficiency and precision.
Sterel	Crafted an optimization-focused website, achieving top-tier scores in SEO (100%), Best Practices (100%), and Accessibility (98%) based on Lighthouse metrics. Elevating the online presence and user experience for the brand's products.
N11 Test Study	Implemented an automated User Acceptance Testing (UAT) for select features of the N11 E-Commerce Website. Enhancing testing efficiency and ensuring robust performance.
Ra-Requestor	A public framework for RestAssured that simplifies the management, creation, and editing of DTOs. Also provides some features about sending requests and verifying responses.

Courses / Certificates

05/2021	Android Bootcamp Certificate of Attendance / Google Developer Group Development of Android Applications with Java and/or Kotlin
10/2018	Design your future (Cloud Systems) / Microsoft Habitat Usage of Cloud based applications for DevOps purposes (Azure etc.)
02/2014	Operation and Usage of Computers / ISMEK Efficiently usage of computers and Microsoft Office and other common applications.

Languages

English	Professional Working Proficiency
Turkish	Native
